

# LU GEN4 ELV-BATTEN

BETTER LIGHTING - BETTER PERFORMANCE

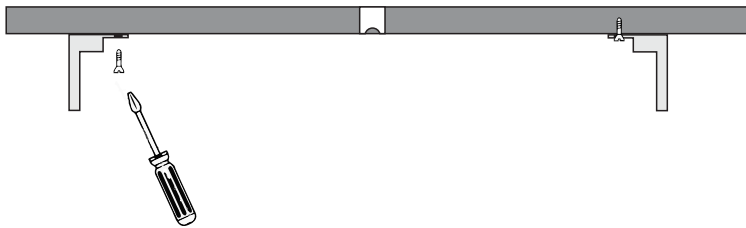

## INSTALLATION USING "OPTIONAL" CUSTOM MOUNTING BRACKETS

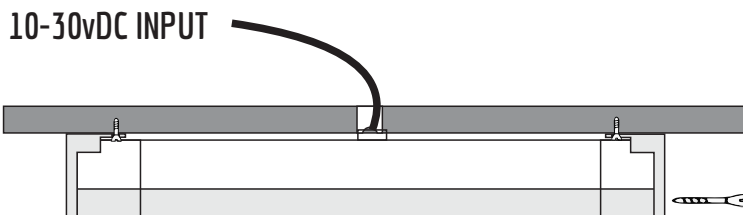

A. Drill 18mm hole for cable. This should be drilled in relation to the centre of light position.

B. With a marker, pencil the batten light edge for new bracket position.

C. Position brackets and fix to wall or ceiling with screws.

D. Attach batten light to new brackets with security screws provided.

*( M4\*40mm Torx security screw )*
