

BATTERY CHARGE 7.5

BM PRO's BatteryCharge7.5 is an automatic battery charger with a world leading, ten charge states designed to increase your battery's life and performance. Adjustable to 3.75, 5 or 7.5 Amps and compatible with all 12 and 24 Volt Lead Acid (AGM, Gel, Calcium, Wet) and LiFePO4 Lithium batteries – the BatteryCharge7.5 is ideal to service your car, caravan, bike, truck or boat battery charging needs.

Equipped with short-circuit, over-temperature and overload protection, the BatteryCharge7.5 also has an LCD display to let you know the charge progress of your battery.

KEY FEATURES

-  Multi-stage charger with adjustable output
-  Ability to charge multiple battery chemistries
-  LCD display shows charge progress
-  Overload and reverse connection protection
-  Capable of charging battery sizes 10-240Ah
-  Durable casing
-  Large clamps for easy battery connection

LITHIUM

SPECIFICATIONS

Output	3.75/5/7.5 Amps
Input	240V, 50Hz
Battery Size	10-240 Ah
Battery Type	Lead Acid, LiFePO4
Battery Chemistry	AGM, Gel, Calcium or Wet, LiFePO4
Charger Type	Multi-stage
Power Supply Mode	12V
