

WHAT OUR CUSTOMERS SAY

No More Guessing

No more guessing how much gas we have left. Instantly know how much you have before you run out. Works a treat and the app will monitor multiple sensors. Too easy.

Brenden C.

Cracker of product for the BBQ

This product is gold. I run three BBQ smokers at home, and now I can monitor my gas levels. Even when we are camping and caravanning, we can take it with us too!

Stewart L.

FEATURES

- Compact, lightweight, tough, water and dust resistant
- Suits most portable domestic gas bottles
- Communicates with smartphones via Bluetooth
- Free app via Google Play and iTunes App Store
- Easy DIY installation with extra strong magnets
- Replaceable standard 3V round battery CR2032

SmartSense is a small monitor which is attached to the underside base of a gas cylinder with two strong magnets. It detects the gas level remaining within the cylinder and sends this information via Bluetooth to a smartphone. The app sends alarm notifications to inform the user when the gas level detected is below the settable threshold.

Multiple gas bottles can be monitored from one phone. Users can configure settings individually for each monitored cylinder, including naming the cylinder, cylinder size (3.7kg, 8.5kg, or arbitrary), alarms and unit of measurement to be displayed as percentage or centimetres. The Bluetooth connection enables remote monitoring for distances of up to 15m from devices using Bluetooth 4.0 + Low Energy (BLE).

GAS BOTTLE LEVEL MONITOR + APP

Never run out of gas unexpectedly again!

**NO GAS?
NO CHANCE!**

Use independently with SmartSense app
or integrated with the JHub or Odyssey app*

*Requires ControlNode

BM PRO SMARTSENSE

Caravanners running their heaters and fridges on gas; café owners using outdoor gas heaters; BBQ lovers and everybody else using liquified gas will find this app to be highly useful and convenient. No more warm water testing, weighing gas bottles or fortune telling – you've got an app for that! Monitor one or more gas bottles with the app on your smartphone and get notified when running low.

Monitor one or more tank levels with the free SmartSense App, on your smartphone.

Never run out of gas unexpectedly again!
